

**NEW!**

From the manufacturer who brought you the "Swiss Army Knife" of O.E. radio key removal and wire terminal extractor kits, comes the next logical tool. Introducing the Mini Fold-Up File Kit. Comes complete with 12 fine files which include; Round, Half Round, Triangle, Flat, Knife, Barrette, Slitting, Crossing, Equalizing, Jointing, Marking.

Files included in kit

Its 12 fine files are all in one convenient storage/handle housing.

Each file flips open and is secured in its a spring loaded latch mechanism. The file housing itself is ergonomically correct which comfortably fits within the palm of your hand. This allows for precision filing every time which is crucial when working with delicate parts.

WORLD WIDE PATENT

**ALLOWS FOR A DOUBLE FISTED TUG!**

WORLD WIDE PATENT

This master radio key kit is an exclusive design which allows the technician for easy removal of "anti-theft type radios" complete as an all-in-one kit. Every key in our kit is secured within a rigid body allowing for a "double fistful pull" or tug. Original equipment factory keys only allow for use with fingers. Even more frustrating beside losing keys is, what to do when more than two keys are needed for the extraction of the radio from its dashboard. This is not a problem with our tool# ST 9015. This exclusive radio key removal kit is ready for action for radio extraction on virtually every vehicle equipped with its O.E. radio; European, Asian or Domestic.

Sir Tools introduces the "Swiss Army Knife" of wire terminal extractors. This internationally patented design offers the technician a handy "all in one" extractor kit that folds up and slides together into its own unique and compact storage housing. Either kit is equipped with factory correct extractor press bits. These press bits release DC wiring terminals from its harness that connect to ECU's, sensors, etc., found on most every late model vehicle.

**Tool# ST 9025**

- A = Tube - Spring Loaded - 3.3mm X 28mm
- B = Square Blade - 1.4mm X 19mm
- C = Flat Blade - 1.5mm X 24.75mm
- D = Flat Blade - 2mm X 23mm
- E = Fork Blade - 8mm X 24mm
- F = Flat Blade - Screwdriver - 3/16" X 1.00"
- G = Tube - 3.3mm X 28mm
- H = Tube - 4.3mm X 13mm
- I = Tube - 3.75mm X 13mm
- J = Tube - 3mm X 13mm
- K = Flat Twin Blade - 1.6mm
- L = Flat Twin Blade - 3mm

Compact Storage Housing  
3.5" x 1.4" x 1.6"

**Tool# ST 9024**

- 1 = Key for European, Asian & Domestic w/ 35 pin ABS, ECU's.
- 2 = Key for European, Asian & Domestic w/ 55 pin ABS, ECU's.
- 3 = Curved & tapered key allows for lever action to easily access & quick release of terminals.
- 4 = Blade follows wire w/o piercing it, allowing for easy access and opening of harness.
- 5 = Key for Domestic & Asian under hood sensors; coolant & throttle position sensor, etc.
- 6 = Key for Domestic & Asian PCM & transmission harness.
