

The Choice Is Yours:

If you choose the complete master kit, you can rest assured that the configuration of 15 press pads and its 3/8" drive adaptor is the most complete assortment available. It has been thoroughly researched so as to accommodate the vast majority of vehicles on the road today equipped with single piston brake calipers.

If you already have an adequate selection of press pads with a twin-pin or 3/8" drive mating surface, you may want to opt for the air-gun stand alone unit.

Sir Tools press pads are available separately.

Part no. ST 9020-KIT "Air-Gun Master Kit"

Over 75,000 Units in Service:
